

**FinTech
Chain**

FinTech Chain Limited

Executive Summary

ASX:FTC

FTC Background

- Registered in Hong Kong
- Founded in Dec 2010; ASX listed in Nov 2012 (formerly known as TTG Fintech Limited, ASX:TUP)
- Headquarter in ShenZhen, China (100% **FTC** own)
- A leading Fintech company who aspires to provide an inclusive switching network for:
 - ★ Bank cards,
 - ★ QR code payments and
 - ★ all crypto-currencies (tokens) payments and cashificationto achieve free circulation, fund settlement, bookkeeping and value-added services under full financial compliances.

Following extensive innovation, research and development, **FTC** has created a comprehensive suite of product lines for the internet-based industry relating to the upgrading of payment transaction clearing systems, mainly including:

1. **T-Linx** system (own IPs), a new generation AI system for integrated payment acquisition services;
2. **Fast Payment** AI software for merchant MIS (management information system) integration;
3. **FEA** (Financial Electronic Authentication) systems for contractual financial certificates, which is traceable & unalterable.

These product lines are recognised as sector leading technologies in the financial industry especially in the provision of end to end solutions from transaction acquisition to transaction switching for both Chinese and overseas banks, credit card organisations, acquiring companies, wallet account partners, Token Issuers who issue tokens and token wallet developers.

- More than 300 banks in China are connected to **FTC** patented **T-Linx** system including China Merchant Bank and Ping An Bank.
- In conservative estimation within China market, **T-Linx** system is serving more than 1M merchants with number of POS machines in 3M.
- Currently, the number of daily transactions processed by **FTC's** systems exceed 1 million.
- In Asia and worldwide, **FTC** is expanding the number of POS machines (i.e. real application scenarios) to achieve crypto-to-fiat currency connectivity and interchangeability.
- Based on the previous 8 years Fintech experience, **FTC** has been expanding business cooperations with Token Issuers & token wallet developers.

Fintech Innovation & Patent Blockchain Innovation & Patent

T-LINX™

- Possessing over 120 Fintech invention and intellectual property patents
- Since 2016, **FTC** commenced its blockchain technology research and development and is now ranked in China's top 10 operators in terms of blockchain invention patent number holdings.

- **FTC's** business income includes:
 1. Client system solution providing and implementing fee;
 2. Commission income and transaction switching fee income relating to each payment transaction;
 3. Other technology service fee including security certification, etc.

FTC + Zipper

FTC continues to innovate through the application of blockchain technologies with **Zipper** community in payment transaction switching businesses (i.e. **Token Cashification**) in conjunction with providing overall blockchain technology solutions to its co-operation partners (including but not limited to Token Issuers & token wallet developers).

Adhering to strict 'know your customer' (KYC) and anti-money laundering (AML) policies, **FTC** accommodates the circulation and transaction processing of various blockchain credits and digital tokens, significantly improving the efficiency of transaction completion in a cost effective manner.

1. Technological realisation driven by scenarios and businesses.
2. Realisation of distributed, efficient, secured and compliance friendly financial needs.
3. Friendly and compatible to existing global standards of financial institutions.
4. Increase the offline/online scenario circulation of existing digital tokens.
5. Build the new switching standards for token payments and cashification.
