Business outlook:

New and proposed PBOC and CBIRC Regulations

The People's Bank of China (PBOC) recently introduced new measures banning the use of personal payment QR codes (including WeChat Pay and Alipay) on its banking network for business collections. This measure is effective from 1 March 2022. In addition, the China Banking and Insurance Regulatory Commission (CBIRC) is seeking public submissions regarding the prohibition of outsourcing service providers/ cooperating agencies of banks from directly charging customers/ merchants for any service fees or collecting the service fees in name of the collaborating bank.

FTC has completed its assessment of the impact on its operation of these changes and considers they will provide a favorable business environment for FTC to further grow its business.

FTC has been providing its payment services in compliance with all existing regulations and empowering its banking partners, as legitimate acquirers, to develop and promote the use merchant QR codes as a compliant payment method in conducting compliant business activities.

The above changes yet to be implemented by PBOC and CBIRC, are intended to ensure only qualified service providers can operate within the highly regulated banking system, further assisting with identifying illegal money laundering or terrorist activities. Both the PBOC and CBIRC proposed measures provide FTC, being a long term qualified independent operator in the payment business sector, a better opportunity to grow its payment acquiring market share. In addition, the implementation of CBIRC's new rules are fully in line with the business model of FTC as a banking system service provider.

Market acceptance of FTC's products and services demonstrates that our business model as healthy and sustainable. The full implementation of the above-mentioned requirements in the near future will certainly ensure a broader market for FTC.

As more comprehensive market management policies/regulations on digital payment sector becomes effective, it allows FTC an enhanced business environment and development opportunities in promoting digital transformation in the current banking network.

Tencent Cloud

As recently announced, Taotaogu (referred to Shenzhen Taotaogu Information Technology Co., Ltd.), a wholly owned subsidiary of FTC, has executed a Joint Solution Cooperation Framework Agreement with Tencent Cloud.

The effect of the contract, is to combine the systems and products of Taotaogu (primarily T-Linx™ SaaS) with Tencent Cloud. Both parties will supply Joint Solutions to Tencent Cloud's banking and corporate customers. At the same time, both parties will also jointly develop new products and services, aiming to equip customers with intelligent digital products.

At present, there are several projects that have been activated, under the scope of this Joint Solution Cooperation. We believe our cooperation with Tencent Cloud will lead to increased FTC revenue and broaden the business prospects of both parties, as well as providing social and economic benefits to the broader public.

The initial term of the contract is 3 years. The contract is based on a revenue-sharing model between the parties, the business income of such brand-new cooperation model is forecast bring substantial growth to FTC in the future.

DIRECTORS REPORT (Cont'd)

Business outlook (Cont'd)

FTC considers this traction a solid base to continue growth in revenue for the remainder of the financial year 2022 and the future.

All the convertible bonds are zero coupon bonds.

The principal amount of convertible bonds can be converted into ordinary shares of the Company at an original conversion price (the "Conversion Price") per share, subject to adjustments, upon giving 30 days notice by the holders of the convertible bonds (the "Holders") to the Company, before the maturity date. The actual total number of ordinary shares can be converted depend on the exchange rate at one day before the conversion.

The ordinary shares to be converted by the Holders carry the same right as the existing shareholders of the Company. If there is dilution of existing shares, the Holders can apply the new ordinary shares on a pro-rata basis to retain their shareholdings. The issuance price of new ordinary shares are not lower than the Conversion Price. If the issuance price of new ordinary shares is lower than the Conversion Price, the Holders can then convert more shares as if the Conversion Price is the same as the issuance price of new ordinary shares.

c) Conversion at the option of the Holders

The Company will, at the option of the Holders convert all the convertible bonds upon maturity.

The fair value of the convertible bonds was determined by an independent qualified valuer. The fair value of the embedded derivatives (conversion and early redemption component) of the convertible bonds was determined using the binomial valuation model. The residual value represents the fair value of the liability component upon the issuance of convertible bonds which was calculated at the present value of the redemption amount, at 100% of the principal amount.

22. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

Fair value measurements and valuation processes

The Board is responsible for determining the appropriate valuation technique and inputs for fair value measurement.

In estimating the fair value, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages third party qualified valuers to perform the valuation. The Board works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model.

The fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used), as well as the level of the fair value hierarchy into which the fair value measurements are categorised (Levels 1 to 3) based on the degree to which the inputs to the fair value measurements is observable.

- Level 1 fair value measurements are based on quoted prices (unadjusted) in active market for identical assets or liabilities;
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Fair value of the Group's financial liability that is measured at fair value on a recurring basis
